We are Graham and Dodd Investors

We believe the price we pay relative to the business we buy is the most important driver of investment returns.

Out-of-favor companies and industries create opportunities to identify investments that offer asymmetric return-to-risk potential.

Companies with strong franchises, managements, and balance sheets are the best positioned to turnaround, gain market share, and improve profitability in an industry recovery.

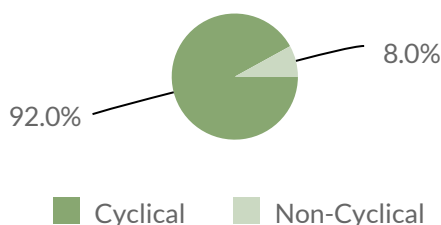

We Focus on Microcap Public Companies (<\$500 million)

By focusing on microcap public companies we believe we:

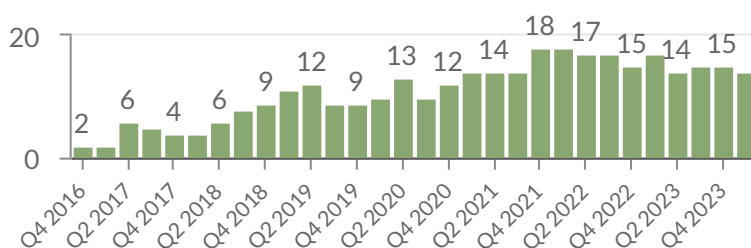

- Can identify companies that are deeply undervalued
- Identify catalysts that we believe can unlock value
- Can add value through hands-on constructive activism
- Invest at valuations that provide a margin of safety
- Can generate attractive risk-adjusted returns in 1-3 years

Our Investment Strategy

While we do not have any specific industry focus, we often find value in industries that have cyclical characteristics:

We focus on building meaningful positions in a small number of portfolio companies:
